**Explanatory Note:** Please see this table's User Guide for detailed explanations of the accountability terms.

Data are shaded for districts that had all schools identified as severe impact and chose to start over as new schools in accountability in 2006-07. Data for all other districts do not include severe impact schools starting over in accountability.

\* The state-level numbers and percentages contain data from all public schools, including the laboratory schools, Type 2 charter schools, marine institutes, Recovery School District schools, and BESE schools. However, as these schools are not under the control of a school district, their data are not included in the district-level numbers and percentages.
