

PROFESSIONAL PERSONNEL ORIENTATION

System-wide orientation activities will be held to provide teachers new to the system with the information necessary to understand their responsibilities as new employees and introduce them to various staff members of the Lafayette Parish School System. Instructional supervisors will meet with the teachers to insure they have an understanding of curriculum initiatives, pedagogy, and testing objectives. Representatives of professional organizations will also be introduced at this time.

Principals of all schools will conduct faculty meetings to orient teachers new to their campus with school guidelines and procedures. Every school faculty member will participate in these meetings to acquire current updates on Lafayette Parish policies and procedures. Teachers new to the school should be introduced to their colleagues, the school staff, and the school plant at these faculty meetings.
