

MEDICINES

As a general principle, medications are not to be given at school. Medications will be administered by school personnel when a licensed physician or dentist certifies in writing that it is medically necessary, that the medication be administered during school hours. The parent or legal guardian must provide written authorization in the form determined by the Lafayette Parish School Board for the school to comply with the physician's medication order and must follow all regulations adopted by the Board.

Licensed team physicians may administer medications, drugs, prescriptions or otherwise during athletic activities with parental consent. ATC's (Athletic Trainers Certified) may administer over the counter medication under the license of the team physician with parental consent.
